

## PRESS RELEASE

Date: 7<sup>th</sup> June 2007

For Immediate Release

For further information, pack shots, samples or assets, please contact Scott Phillips – [scott@justflight.com](mailto:scott@justflight.com)

## TWO MORE SLICES OF THE REAL CAKE!

Just Flight's VFR Real Scenery London – a unique download package from the VFR Real Scenery series – has been a huge success and clearly shows that many customers are keen to obtain the very best photographic scenery in bite-sized chunks. Following the release of second volume in the series (Central & Southern England), two more areas are now available to download exclusively from [www.justflight.com](http://www.justflight.com)

VFR RS - Isle of Wight and VFR RS - Birmingham, Coventry, Wolverhampton bring two very different parts of the country to a download audience. The Isle of Wight volume includes the entire island and all the principle towns - Newport, Cowes, Ryde, Sandown, Shanklin, Yarmouth and Ventnor. There is also a fantastic 3D rendition of The Needles (including the lighthouse). A unique feature of Just Flight's VFR Real Scenery series is the way the coastlines have been carefully edited to make them blend realistically against the sea in Flight Simulator X. The long coastline of the Isle of Wight shows this off to great effect.

For anyone who wants to fly round the busy conurbations of the Midlands, then Birmingham, Coventry & Wolverhampton is just the ticket. It covers a huge area and as well as the cities in the title it also includes Dudley, Kidderminster, Tamworth, Nuneaton and Stourbridge. The individually edited night lighting present in the entire VFR Real Scenery series is particularly impressive in this region, with its many road junctions and the inland waterways show off the water effects brilliantly – did you know that Birmingham has more miles of canals than Venice?

Both packages are very competitively priced at £9.75 / €14.50 / \$17.50 and are available exclusively from Just Flight's website at [www.justflight.com](http://www.justflight.com)

- VFR Real Scenery uses the very latest 25cm digital aerial images from GeoPerspectives displayed at 1m per pixel resolution in FSX.
- Includes 9.6m mesh terrain data which hugely improves the default relief.
- Individually edited night textures make flying after dark a real eye-opener!
- Water features are rendered with Flight Simulator X water effects – you can land a seaplane in VFR Real Scenery.
- Airport runways are correctly aligned between FSX and VFR Real Scenery – there are no ghosts in VFR Real!

## **About Just Flight**

Just Flight is the world's leading flight simulation specialist, publishing a wide variety of digital aviation products. Their range comprises a multitude of different titles, including stand alone flight simulations as well as add-ons for Microsoft's multi-million selling Flight Simulator and Combat Flight Simulator. Just Flight also has Just Trains, a specialist label devoted to stand alone train simulators as well as add-ons for the ever-popular Microsoft Train Simulator.

A British company, based in Cambridgeshire, Just Flight has been established for over ten years. It prides itself on quality, value and customer service, which it backs up with a unique money-back guarantee on all its products.

## **About GeoPerspectives™**

GeoPerspectives, formerly marketed as UK Perspectives, is the only brand that offers national orthorectified aerial imagery and a guaranteed rolling five-year update programme. GeoPerspectives uses the latest technology to capture the most accurate and up-to-date aerial photography, colour infra-red imagery and digital terrain & surface models of England and Wales. GeoPerspectives data is used by government, commercial and academic professionals, including the Department for the Environment Farming and Rural Affairs (Defra), Highways Agency, Yorkshire Water and many UK Local Authorities.

GeoPerspectives is a joint venture between Infoterra Ltd and BlueSky International Ltd.
