## TYPHOON WARNING!

<b>Title</b>	<b>Eurofighter</b>
<b>Label</b>	<b>Just Flight</b>
<b>Developer:</b>	<b>Combat Planes</b>
<b>Genre</b>	<b>Flight Simulation</b>
<b>UK Release</b>	<b>TBA</b>
<b>SRP</b>	<b>TBA</b>

The Eurofighter Typhoon is well on its way to re-equipping the air forces of Britain, Germany, Italy, Spain, Austria and Saudi Arabia. Now, thanks to Just flight and the team at Combat Planes, you can add the Flight Simulator air force to that list.

The real Eurofighter is an amazing aircraft and its simulated sibling is equally impressive. Eurofighter is packed with features and comes with five national air force liveries and a number of type variants including single and twin-seaters. In all there are 39 aircraft to fly and Flight Simulator X pilots can take part in 25 exciting missions and take up residence at any of the six different European airbases that are included. In some of the FSX mission suspicious aircraft must be detected with the CAPTOR radar; meanwhile, pilots can select weapons, operate missiles and drop the external fuel tanks. The superb virtual cockpit has a wealth of detail and different features and there is even the option to fly with another pilot in multiplayer mode.

With many other unique features that include a functioning air-to-air radar, throttle controlled re-heat and a completely 'clickable' virtual cockpit, you can see why all the world's virtual air forces will soon be equipped with the Eurofighter!

To see some early screenshots of Just Flight's Eurofighter and for other early product news on upcoming Just Flight products why not visit the new 'In Development' section on the Just flight website. Click [here](#) for the Eurofighter details and screenshots.
