### Float and ski additions to the Tiger Moth hangar!

The wheel and tail dragger versions of this iconic biplane have already won a huge amount of critical acclaim in Just Flight's Tiger Moth package. But now the development team at Aeroplane has come up with something a little different – Tiger Moths on floats and skis!

The good news is that you don't need to have the full Tiger Moth program installed to answer the call of the sea or break the silence of the snowy wastes – both packs are unique aircraft that can be downloaded and installed straight into Flight Simulator X or 2004.

These aircraft come with the same award winning features of the land based machines and the accurate, detailed models have been carefully researched to ensure the highest levels of authenticity and realism. Superb sound sets, realistic animations and textures come together to bring you two great aircraft that will broaden your horizons even further!

Click [here](#) for full details of both packages and be sure to check out the [special offer here](#) where you can but the packs together and make a saving.

### **About Aeroplane Heaven**

Aeroplane Heaven is one of the world's top developers of virtual aircraft. The team design and create award-winning virtual models of classic aeroplanes for a wide range of uses including film, television and flight simulation. For Microsoft's Flight Simulator, AH specialises mostly in building vintage warplanes and trainers from the 1930s and 1940s. Very few developers can match the high levels of authenticity and detail to be found in an Aeroplane Heaven production.
