A PACKED JUST FLIGHT HANGAR FOR 2007

Label: Just Flight
Genre Flight Simulation 2004 & FSX

It's building up to be a busy year for Just Flight. We've currently got over a dozen new titles on the radar for release this year and there are more in the pipeline, so expect further announcements. More and more products will be available to buy by direct download if this method is more convenient and suitable.

We know that not everyone has yet to upgrade to FSX yet, so there's plenty here for the dedicated FS2004 pilot. We've got airliners both classic and modern, prop-driven warbirds, a jet fighter, helicopter, a business jet, GA favourite, mission pack and even a collection of Orbiter space shuttles for you to guide back to terra firma!

Release dates for all of these fantastic add-ons are still to be confirmed but we hope that this list whets your appetite. To keep up to date with the release dates for forthcoming titles please refer to the Just Flight website – www.justflight.com
