

**G2 Games News Release**  
**For Immediate Release**

## **Enemy Engaged returns** **Sequel to classic chopper sim in development**

**London, UK (January 2007)** – Leading UK publisher **G2 Games** today announced the return of a classic helicopter flight simulation for PC CD-ROM. **Enemy Engaged 2** is the sequel to the best selling chopper classic - **Enemy Engaged: RAH-66 Comanche Versus Ka-52 Hokum**. A game that received universal praise for its dynamic and ground breaking content that maintains a large player base even today.

Released in 2000, the original **Enemy Engaged** set the standard for 21st century flight sims with stunningly realistic visuals and attention to detail. **Enemy Engaged 2** is set to take the series even further with new dynamic missions and a complete overhaul of the graphics and audio to bring the game up to date with the latest and best flight simulations available.

**Enemy Engaged 2** has been in development since early 2005 and is scheduled for release in 2007.

**Press Acclaim for Enemy Engaged: RAH-66 Comanche Versus Ka-52 Hokum**

"What makes a good sim? Three words--Suspension of Disbelief. The same words of advice you'll hear in an entry-level writing course. Make the participant in your dream believe in your vision more than reality itself. Enemy Engaged achieves that lofty goal in so many ways and so much more powerfully than any other simulator I have every played."

"The best helicopter simulator on the market, bar none."

"I only wish I didn't have to turn my attention to other games to review, as my many hours with this title have persuaded me I'm only scratching the surface of this very dynamic sim."

"This is the helicopter sim you've always wanted."
